# Management Information Systems

## Associate of Applied Science

Quick, easy and accurate access to information is vital in all facets of today's business. Managing computer-based information systems is a critical part of any organization. The Associate of Applied Science in Management Information Systems is designed to provide you with both the business skills and computer skills to solve today's business problems. This two-year program will prepare you to enter the job market or to continue your education toward a bachelor's degree in MIS at the Clearfield Campus. Careers include web site support and database manager.
