

# Campus Beautification Project Recommendation

Name: Tammie Allen

Date: 10/19/07

Recommended work: (please include location and detailed scope of work)

Install sidewalk beside Rec Center. Students are currently walking on road or on muddy path beside the building.

Install sidewalk from parking lots on the upper side of Zimmerli that runs behind Zimmerli – students tend to walk in grass behind Zimmerli to go to Raub, Robinson, etc. They don't seem to walk along the street on the sidewalk.

If possible, install stairs from the 'Silk Mill' parking lot to the parking area by the Health Professions Building/Rec Center.

Remove/Replace the tree on the corner of the back of Ulmer Hall. It drops berries on the vehicles and sidewalk in the fall. The berries make a mess and can be slippery when wet.

Install small covered waiting areas at the specified Trolley stops for students to wait out of the weather.

Replace the old warn wooden benches around campus. They are not very nice looking and some look unsafe.
