

Nanotechnology Seminar Series

The Nanotechnology Seminar Series is intended to bring together faculty members, students, and guests for exchanging ideas and research experience in the multidisciplinary field of nanotechnology.

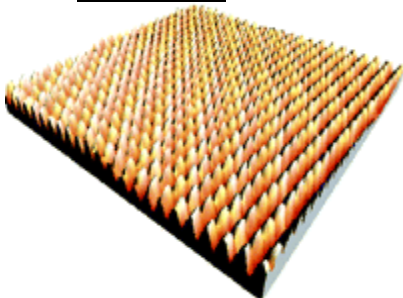

Topic: "Alternative approach for fabrication of polymer based light emitting devices"

presented by Stephen Swiontek, supervised by Dr. M. Tzolov

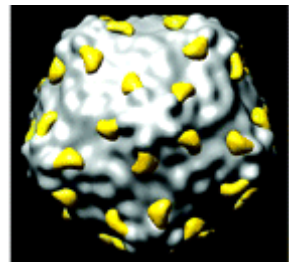

This presentation summarizes the work of Stephen Swiontek during the early summer of 2008 on fabrication of polymer light emitting diodes. The principles of operation of this class of diodes will be discussed together with the optical properties of the particular polymer used in this study. This work will be presented at the Central PA Regional Conference/KME Regional Conference, Bloomsburg University October 17-18, 2008.

When: October 14th, 6:00-6:30 p.m.

Place: Ulmer Hall, room 222

All faculty members and interested students are kindly invited.

For questions and comments contact Dr. Marian Tzolov (mtzolov@lhup.edu).
