

Nanotechnology Seminar Series

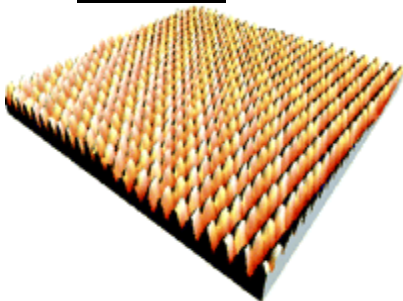

The Nanotechnology Seminar Series is intended to bring together faculty members, students, and guests for exchanging ideas and research experience in the multidisciplinary field of nanotechnology.

Topic: “Organic light emitting diodes”
presented by Sean Gephart, supervised by Dr. Marian Tzolov

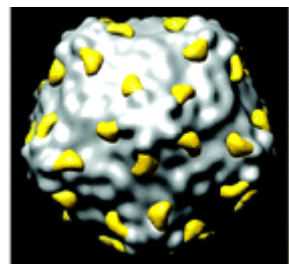

Abstract: The presentation will start with the basics of the organic light emitting diodes and with highlighting of some interesting effects typical for the organic semiconductors. The central part of the presentation will be the main results from the experimental work on fabrication of polymer light emitting diodes during the last summer.

When: Oct. 3rd, 6:30-7:30 p.m.

Place: Ulmer Hall, room 225

All faculty members and interested students are kindly invited.

For questions and comments contact Dr. Marian Tzolov (mtzolov@lhup.edu).
